

Overview

Whether you are looking to create a customised application environment, build a fit for purpose application or streamline an existing application portfolio, *Elite offers support and development services that meets your business needs.

Filling a niche market within the **Oil and Gas Business & IT Consultancy** where extensive industry and domain experience is matched by local knowledge.

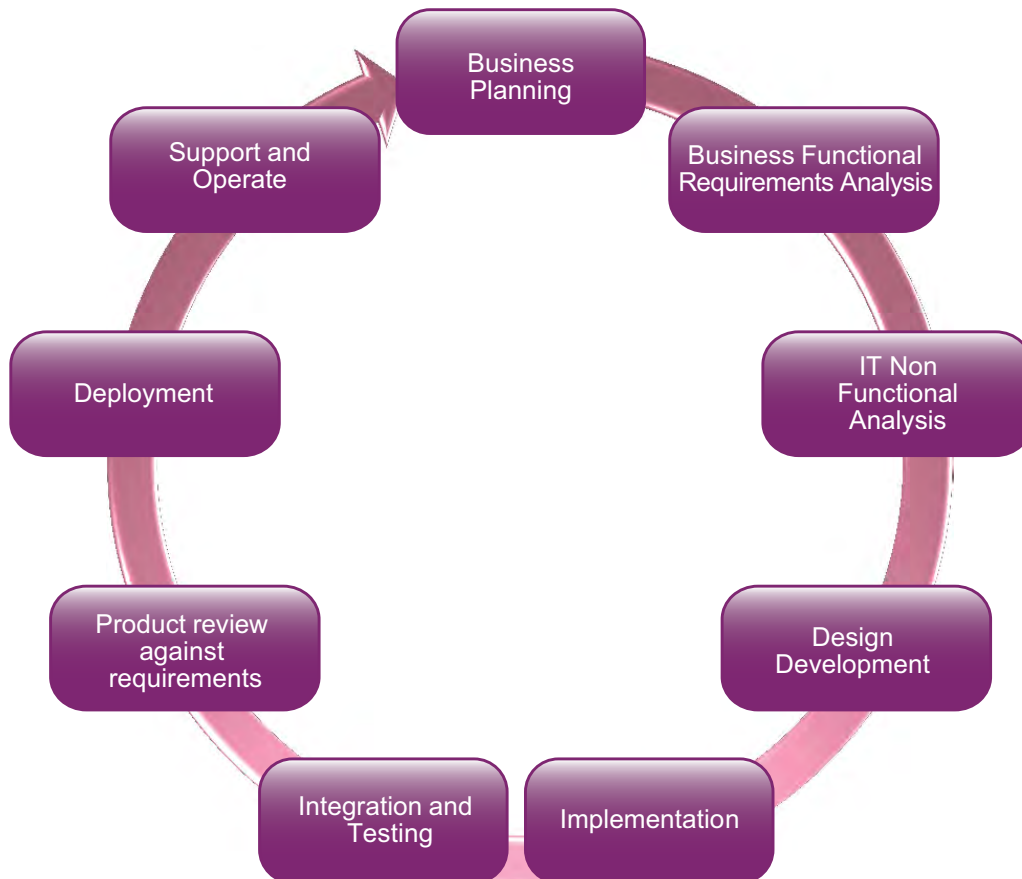

Application Development

We have the niche Oil and Gas application development expertise in our core team and associated partners to provide innovative application solutions to support all areas of Your Business.

Whether you are looking to develop an application solution that solves a business problem or drive efficiency through the use of automation, Elite can provide the subject matter expertise that will take your Business to the next level.

Our Consultants can lead the full application development lifecycle and our specialised application development services include:

- Functional and Non Functional requirement gathering
- Process and system gap analysis
- Application design, development, testing, integration and implementation
- Application rationalisation/transformation programmes
- Business support models and support outsourcing activities

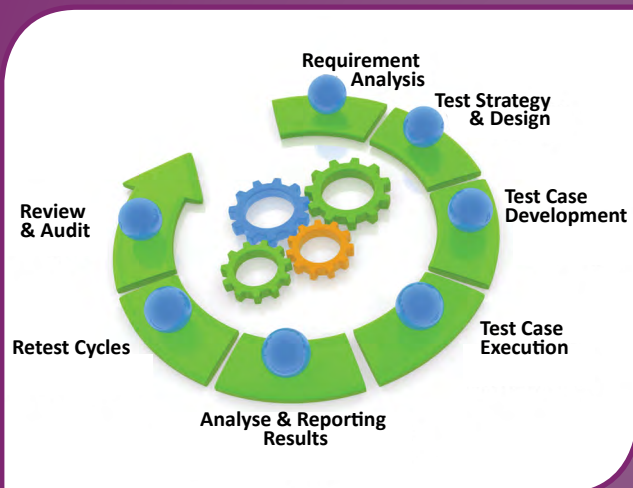

Application Portfolio Management

We understand that as Your Business grows or divests, the demands around your application requirements can change overnight. With an application foundation born in the Oil and Gas Industry, **Elite** experts always have an up to date knowledge of the latest application innovations, products and releases.

We can offer a set of overall portfolio management solutions that will reduce the complexity of your current application landscape, reduce the total cost of ownership, increase the functionality and improve the quality of your business data.

Elite has years of proven experience in managing complex application portfolios for a wide range of Oil and Gas Clients and have driven high value results in Local, Regional and Global Application enhancement programmes; thus ensuring the Business gets the maximum value out of its existing portfolio with a structured and professional approach to upgrade programme management.

Our Consultants have application domain expertise in areas of Production Management Systems, Work Management (Maintenance) Systems, Future Planning Systems, HydroCarbon Account Systems and ERP combined to over 200 years of experience in these areas.

Application Testing Services

Testing both the technical and functional elements of the system and business process flows is a core service that **Elite** offers to our entire Client base. With all our Test Leads and Test Engineers having over 10 years of domain expertise, we can offer a comprehensive outsourced test service or add subject matter expertise to your existing IT Function.

Our service offering is underpinned with clear understanding of business process and business work flows, combined with a deep technical understanding of systems and test toolsets.

Information and Data Management

We understand that Information and Data Management is the core backbone of every successful application programme and we offer expertise in:

- Information & Data Diagnostics
- Information & Data Cleansing
- Information & Data Managed Services
- Surface and Sub-Surface Data Strategy Definition

As seasoned Business & IT Consultants with extensive knowledge and experience in business operations, consultancy and technology, we recognise the benefit of being able to provide a co-ordinated team of highly motivated, competent and professional Consultants experienced in all necessary disciplines to an industry whose needs and requirements we both recognise and understand.
