

Overview

***Elite** is an Exploration and Production IT and Business Consultancy. We can add value to your business, because we know your business.

Oil and Gas is not a minor department in a large scale portfolio, it is our core competence and all our Consultants have significant experience working in the Oil and Gas Industry and the services we offer are core to exploration and production.

Work Management and Maintenance Efficiency

Maintaining Production and ensuring safe operations is dependent on accurate, supportable and planned maintenance activities. Innovation and access to accurate data is fundamental to delivering a world class work management system.

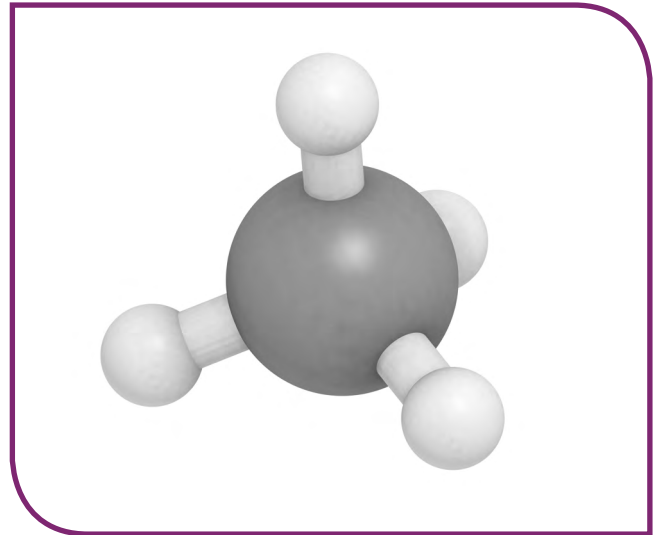

We have experience in delivering end to end systems, from simple planning and scheduling systems to complex multi-layer systems.

Hydrocarbon Accounting & Production Performance Management

We understand the fundamental requirements for monitoring IT and business processes for production, transport, sales and revenue of oil and gas. Our teams of Consultants have expertise in the scoping, development, design and implementation of local and global scale hydrocarbon accounting systems with small to large scale operators with highly complex asset partnerships.

Our expertise will ensure you gain integrity around the monitoring and reporting of every hydrocarbon produced, transported or sold, which will determine the value of the oil and gas from your assets.

From small bespoke systems to global market leaders such as Energy Components, **Elite** understands the complex contractual agreements and IT Systems which are commercially critical to your value chain.

Planning and Asset Modelling

The success and efficiency of production is determined by the accuracy of both your long term planning and asset modelling processes. **Elite** has expertise in all areas of long term asset planning and integrated asset modelling which will help drive the efficiency management Your Business needs. We specialise not only in the individual components and processes that ensure accurate planning and management, but also the complexity of the interaction and interfaces.

Safety and Logistics

We understand that the primary focus of all on and off-shore activity is the safety of your people. From Training Management to Permit to Work and People on Board systems, **Elite** has the expertise and passion to bring the level of assurance to your operational activity. We understand the industry regulation and will ensure that your safety priorities are delivered through robust process and systems.
