IT Strategy

As an organisation you need to have a strong, dynamic IT Strategy that incorporates your Company's vision and supports the overall Business Strategy. Defining the direction of your IT Roadmap and planning for the future of your enterprise is essential to delivering robust services that keep up with the fast pace of technology.
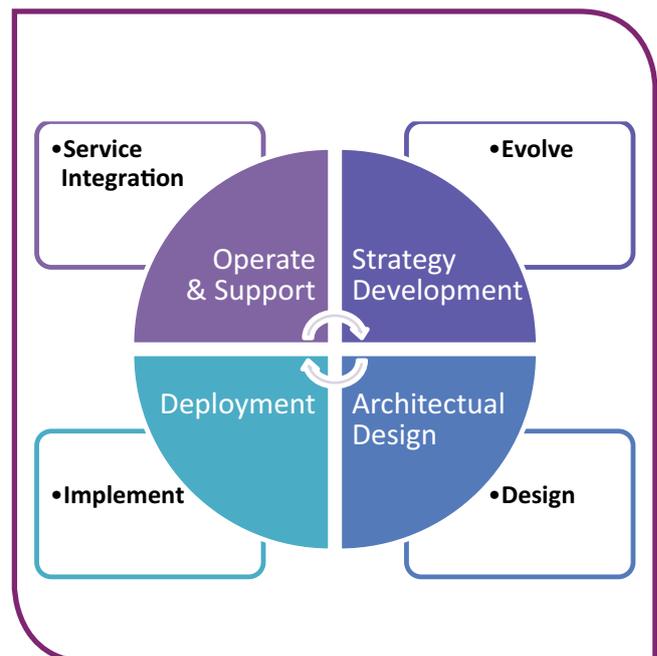

*Elite understand the changes in Oil and Gas Industry and the fundamental strategies that E&P Company's need to follow to become leading Operators. This knowledge is essential when supporting Our Clients in the delivery of a world class IT Strategy and Roadmap. Whether you are just beginning the journey of strategy development or looking to benchmark against industry leaders, Elite can provide the expertise you require.

We bring both Business and IT perspectives to assist Oil & Gas organisations in evaluating technology opportunities and developing IT strategies and plans.

Combining our deep IT strategy, industry and technology implementation experience with other needed skills available through Elite we help IT and Business Leaders:
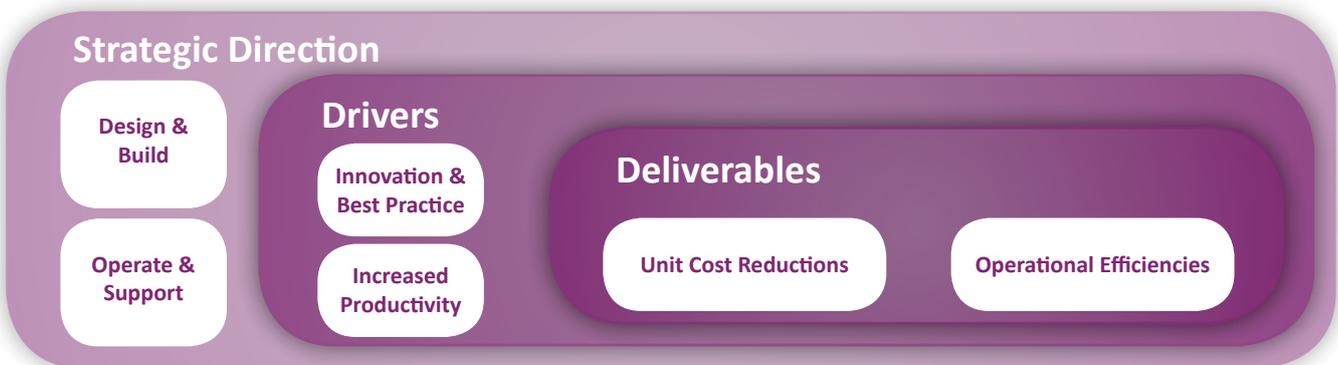

- Guide their organisation in leveraging IT to move the Business forward
- Quickly identify how the IT organisation can provide greater value to the Business
- Determine the IT capabilities and strategies needed to exploit emerging business opportunities
- Develop the appropriate IT strategy and roadmap for delivery
- Improve the operations and processes of the IT function, making it more effective and efficient, to align more closely with the business strategy
- Get the most business value from IT investments

Business Engagement and Alignment

As an IT organisation you always strive to align the Business and IT Strategies to drive the overall performance of the company and create the trusted/intimate environment. Alignment of the overall goals can often be difficult to achieve due to the different, and often conflicting, factors that influence the two roadmaps.

Elite has the experience and tool sets to drive the results and satisfaction that you require to become and maintain a position of trust and synchronicity within your business areas. Using tools such as Strategic Roadmap Templates and Strategy Planning Processes our team can offer the stepping stones your business needs to take to overall success and alignment.

Strategic Direction

- Design & Build
- Operate & Support

Drivers

- Innovation & Best Practice
- Increased Productivity

Deliverables

- Unit Cost Reductions
- Operational Efficiencies

Delivering the optimum operating model does not result from trying to shoehorn business process into existing off-the-shelf technology. Elite understands that for Strategies, Projects and Service models to be high value, there must be a strong, transparent and trusted relationship between the business and IT. To drive towards a symbiotic relationship, business engagement must be structured, formalised and supported by the right resources with the right tool sets.

Governance and Change Management

We have a dedicated practice to help our clients deploy a bespoke change management programme in their organisation to support them through the impact of new technologies and processes. Our Consultants have the expertise to provide the confidence and trust to deliver your requirements.

Elite's approach to IT deployments, project management and process improvement is always underpinned by strong stakeholder governance and rigorous change management methodologies.
